Benefits

A varied educational and cultural program

Highly qualified teachers

Studying of modern educational technologies, models and practices implemented and applied at Minin university

High practical orientation of the program

Students' reviews

Dr. Shang Yongjia Professor, Institute of Chemistry and Materials Science (Anhui Normal University, China)

Your city is so bright, colorful and has such a rich culture that I liked it a lot. We learned a lot about some specific practices that are used at Minin university and, also we got to know how educational programs are organized and implemented.

Cui Zhifeng, Professor of the Institute of Physics, Doctor of Physical Sciences (Anhui Normal University)

The most important thing in cooperation is experience exchange in the sphere of higher education, especially higher pedagogical education. In general, education systems in Russia and China are quite similar.

Experts' reviews

Prof. Alexander Fedorov, Acting Rector of the Immanuel Kant Baltic Federal University (Kaliningrad):

This is a unique program that celebrates its 5th anniversary this year. In fact, this program has no analogues in Russia, since this is a form of additional international education for our partners from China.

Ms. Olga Nazaykinskaya, Director of the SKOLKOVO Education Development Centre

Minin university offers us one of the excellent examples of programs that should be exported. No doubt that all the approaches that are discussed and used here, all evolutionary decisions, your project team and change teams form the program that should be distributed, developed within the Russian Federation and exported as a very successful product.
